Even When
You're Not There*

FIRSTCALL
24/7 Emergency Monitoring

For Your Peace Of Mind

www.myalertsystem.com

Peace Of Mind At the touch of a button.

Throughout your lifetime, your elders have been there for you. Now as you begin to care for them, be assured that you can provide constant care and assistance by installing our FirstCall® 24-hour emergency monitoring service. Help is available at the touch of a button.

Medical Emergencies

Thoughtful care is immediate with FirstCall's® Cooperative Response Center. When an emergency arises, a simple touch to the button on either the receiver or wireless transmitter instantly connects your loved one to a professional central station operator (CSO) who will quickly assess their needs and send the appropriate help. Motion sensors can monitor daily activity.

Intrusion Emergencies

Call today to learn more about other important security features that FirstCall® can easily provide for you and your loved one. With FirstCall®, we can provide constant care...even when you're not there.

Fire Emergencies

Our 24-hour emergency reporting system is the most sophisticated 2-way voice technology available. Its superior speaker clarity, range and built-in battery back-up will even monitor for power failures on the property...A great solution while on vacation.

The long range waterproof button can be worn at all times on the wrist or around the neck, indoors or out. If help is needed, a simple touch of the button activates the alarm system and contacts the response center.

Our professionally-trained CSO's are available 24/7. When contacted, the automated system displays all subscriber information, such as address, family & medical history. The receiver's powerful speaker allows conversation from within the home and opens two-way voice communication.

If emergency help is needed, the appropriate authorities will be contacted immediately and help will be on the way. If the alarm is not an emergency, a friend, neighbor or family member can be called to assist...help will be there 24-hours per day!
